

aurafirm N

FERMENTED LIQUID OAT ACTIVE

A LACTOBACILLI FERMENTED NATURAL OAT ACTIVE THAT IMPROVES COMPLEXION RADIANCE WHILST FIRMING AND RE-PLUMPING THE SKIN.

Created through specialist fermentation utilising unique, versatile and stable *Lactobacilli* strains, *aurafirm N* is an active containing glycolic and lactic acid (in an excellent ratio), skin signalling oat peptides, phospholipids and polyols all which help firm and replump the skin. These microbiome supporting compounds, along with the power of oats, rapidly promote healthy skin that looks radiant.

TECHNICAL DATA*

Manufactured	Germany
Physical Form	Turbid Liquid
Colour	Pale Brown
Solubility	Water Soluble
pH	3.5 - 4.5

*Indicative Typical Values

INCI LACTOBACILLUS FERMENT (1-5%), AVENA SATIVA KERNEL EXTRACT (1-5%), SODIUM BENZOATE (1%), POTASSIUM SORBATE (0.1%)

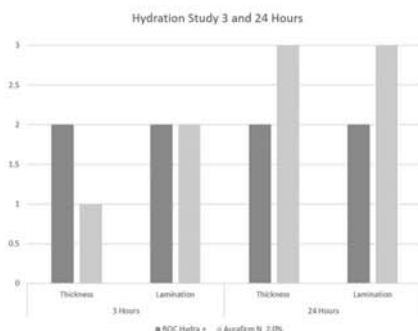

Fat Content 6.8 g per 100g

THE POWER OF FERMENTATION

aurafirm n is created through the fermentation of Oat COM USP using a patented process and unique, versatile and stable Lactobacillus strain. Bio-chemically breaking down Oat COM USP into simpler substances, creates more bio-available molecules (including antioxidants and amino acids) which are able to penetrate past the stratum corneum.

WHY AURAFIRM N?

Benefits

- ▶ **Skin Hydration** - Boosts skin thickness and lamination.
- ▶ **Exfoliates** - Superior skin exfoliation through AHA activity.
- ▶ **Microbiome** - supports the faster natural recovery of the skin microbiome.

5µm - thin histological cryo sections stained according to trichrome masons protocol showing the stratum corneum.

Ex-vivo Study

At 0.5% and 2% concentration, *aurafirm n* induces a moderate increase in stratum corneum thickness and lamination. In its very simplest form, *aurafirm n* has better hydrating power than a fully formulated product created specifically for this purpose.
